**Save up to
80% on
heating bills.**

Our Story

Established in 1980, EarthLinked Technologies, Inc. is a research and technology company committed to simple, efficient and effective ways to make life easier for people and the planet. The EarthLinked Geothermal Renewable Energy System not only challenges the status quo in heating and cooling, but alters the way people think about geothermal technology as it currently exists. EarthLinked systems are operating in a variety of applications and climates, saving energy and the environment globally. But the story doesn't end there.

How You Benefit

- 1 | Year-Round Comfort**

We understand that your family's well-being comes first. EarthLinked is the only system with **100% geothermal heating and cooling** throughout every season. The simplicity of our design allows for a more efficient transfer of heat, which means warm and toasty winters and cool and comfortable summers.
- 2 | Savings From Renewable Energy**

The U.S. EPA and DOE have determined that ground source heat pumps have the lowest environmental impact of all heating systems, and they **reduce consumption and corresponding emissions up to 75%**. Having this consistent heating and cooling system will also increase your property value with the added benefit of receiving **FREE hot water**.
- 3 | Quick, Low Impact Installation**

EarthLinked Geothermal Renewable Energy Systems are able to provide year-round comfort in a smaller, more compact design. A system can be installed in almost any location, regardless of space limitations. Installation time is shorter, more affordable, and best of all, convenient with minimal impact to existing landscaping.

How It Works

Quality and simplicity are key. The EarthLinked System “harvests” the constant energy directly stored in the Earth by the sun. The system moves heat using a closed loop of environmentally friendly refrigerant. The true effectiveness of the energy transfer comes from our unique use of copper as an uninterrupted path to the heat source, resulting in a system **400x more effective** than that of plastic or other materials.

Why It’s Better

Simple

We are revolutionizing renewable energy with a smarter and smaller design. Our compact systems require the **smallest yard spaces for installation** and can be installed in almost any location in a limited amount of time. We care about your yard, so we streamline the process and make the installation as simple as possible.

Efficient

With Energy Star superior efficiency, the EarthLinked Renewable Energy System is the only geothermal system that offers **100% of all heating and cooling needs to your home**, with no additional pumps or equipment required. Our systems work hard and stay “green.” We keep you and the environment safe by avoiding the use of toxic chemicals.

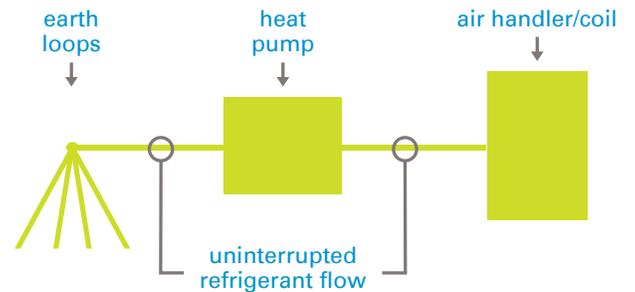

Effective

Our powerful technology delivers results that speak for themselves. Just as sure as the sun will rise every day, it will provide us with an **endless source of energy**. The EarthLinked Renewable Energy System provides an effective heat transfer that no other competitor in the market can offer, and our dedication to your consistent comfort is unmatched.

Simple Design

The EarthLinked Renewable Energy System operates on an uninterrupted flow of stored solar energy.

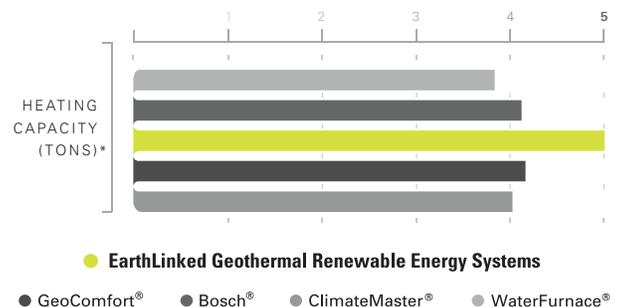

THE DIRECT METHOD

Choose Performance

The EarthLinked Renewable Energy System achieves fully rated heating and cooling capacity in your home all year round.

Comparison of the Leading 5-Ton Geothermal Systems

*Standards: AHRI 870/871 • ISO 13256-1 • ISO 13256-2

What's Next?

Don't wait for your next utility bill. Act Now. Innovative and trusted technology for your home is just around the corner. In just three easy steps, you can own an EarthLinked Renewable Energy System and be on your way to a simple, efficient and effective solution for year-round comfort.

1 Design Your System.

Schedule a time for us to talk about the most effective geothermal option for you. Our EarthLinked Elite Dealers will customize and fit your EarthLinked Renewable Energy System and earth loop installation for your home. The final system will not only be designed specifically for your home, but also your lifestyle.

2 Finance Your System.

You could qualify for tax credits, rebates, incentives and/or financing. We can help you find a payment plan to bring the best renewable energy system to your home without breaking your budget.

3 Enjoy Your System.

Once you have chosen your system, you will schedule an appointment for installation. The EarthLinked Renewable Energy System can be installed inside or outside the home depending on preference. You will receive a welcome packet and user manual from our EarthLinked Elite Dealer to introduce you to your new system and unmatched comfort.
